Hamburg, 28.03.2017

DEA preparing two deviation wells

DEA Deutsche Erdoel AG is planning deviated extensions of two already existing wells. The deviations in the two production wells Völkersen-Nord Z6 and Völkersen-Nord Z4a are intended to develop reserves of natural gas located at a depth of around 5,000 metres. The deviations are to be drilled from the existing production sites near Grasdorf. The drilling rig required for the task is scheduled to be put in place in June. The existing wells will be deviated deep underground. The Völkersen-Nord Z4a project was already presented to the local stakeholders back in September 2015. DEA is now resuming the planning and will use the company's own T-160 drilling rig for both deviation wells.

Stavanger, 28.03.2017

DEA is committed to Njord upgrade

DEA is ready to invest in the future of the Njord area in the Norwegian Sea. The partnerships in the licences Njord and Bauge have submitted the plans for the development projects to the Norwegian Minister of Petroleum and Energy, Terje Søviknes. Capital expenditures for both fields total more than 2 billion Euros. DEA recently increased its interest in seven licences in the Njord area and has now a share of 50% in the Njord field.
