Kassel/Hamburg. Wintershall Dea will be joining the 85th Conference and Exhibition of the European Association of Geoscientists and Engineers in Oslo from 10-13th June 2024.

EAGE 2024 takes place under the theme "**Technology and talent for a secure and sustainable energy future**". The event brings together industry, professionals and academia to consider how the latest geophysical, geological and engineering ideas can contribute to energy security and a sustainable energy transition.

Wintershall Dea searches and produces natural gas and crude oil worldwide – as a reliable partner, an experienced pioneer and with an ambitious team. The Wintershall Dea Team will be highlight – at Booth 2100, Hall D - how it uses technology, innovation and geological expertise. Presentations will demonstrate Wintershall Dea's activities in

both natural gas and oil exploration and production, and for its developing carbon management and hydrogen activities.

The Wintershall Dea stand will host the experiment the FluidFlower" which is a layered sand model which mimics an actual reservoir. It demonstrates real CO2 storage on a minimized scale. The injections will take place in Hall D, 2100:

- Tuesday, June 11 - 1:30 p.m.
- Wednesday, June 12 - 1:30 p.m.
- Thursday, June 13 - 12 a.m.

The Wintershall Dea stand will also host a series of talks from the company's experts, on topics including:

- Exploration globally, in Mexico and Norway
- The company's CCS and hydrogen projects
- IT and Digitalization topics, as Open Subsurface Data Universe and Generative AI, and
- Technology & Service Center of Wintershall Dea - A place for Innovation.

Further information on Wintershall Dea's activities in the field of carbon management and hydrogen can be found under the following link: [CCS and Hydrogen | Wintershall Dea AG](#).

A full programme and timings will be available via our social media channels and at our stand.

About Wintershall Dea

Wintershall Dea is a leading independent European gas and oil company with more than 120 years of experience as an operator and project partner along the entire E&P value chain. The company with German roots and headquarters in Kassel and Hamburg explores for and produces gas and oil in 11 countries worldwide in an efficient and responsible manner. With activities in Europe, Latin America and the MENA region (Middle East & North Africa), Wintershall Dea has a global upstream portfolio and, with its participation in natural gas transport, is also active in the midstream business. And we develop carbon management and low carbon hydrogen projects to contribute to climate goals and secure energy supplies. More in our [Annual Report](#).

As a European gas and oil company, we support the EU's 2050 carbon neutrality target. As our contribution we have set ourselves ambitious targets: We want to be net zero across our entire upstream operations – both operated and non-operated – by 2030. This includes Scope 1 (direct) and Scope 2 (indirect) greenhouse gas emissions on an equity share basis. Wintershall Dea will also bring its methane emissions intensity below 0.1 per cent by 2025. We endorsed the World Bank's Initiative 'Zero Routine Flaring by 2030' and continue to support the initiative aimed at eliminating routine flaring in operated assets by 2030. In addition, we plan to support global decarbonisation efforts by building up a carbon management and hydrogen business to potentially abate 20-30 million tonnes of CO₂ per annum by 2040. You can find more about this in our [Sustainability Report](#).

Wintershall Dea was formed from the merger of Wintershall Holding GmbH and DEA Deutsche Erdoel AG, in 2019. Today, the company employs more than 2,000 people worldwide from almost 60 nations.

The shareholders of Wintershall Dea (BASF and LetterOne) and Harbour Energy plc (Harbour) signed a business combination agreement in December 2023 to transfer Wintershall Dea's E&P business consisting of its producing and development assets as well as exploration rights in Norway, Argentina, Germany, Mexico, Algeria, Libya (excluding Wintershall AG), Egypt and Denmark (excluding Ravn) as well as Wintershall Dea's carbon capture and storage (CCS) licenses to Harbour. Until closing, Wintershall Dea and Harbour will continue to operate as independent companies. The transaction is, among other things, subject to approvals of merger control and foreign investment authorities in several countries. Subject to these regulatory approvals, closing is targeted for the fourth quarter of 2024. See the full BASF release [here](#).
