

Paris/Hamburg, 12.06.2017

Success through sustained technical solutions

DEA at EAGE in Paris

From 12 to 15 June, DEA is presenting applied technology highlights and recent projects at Europe's most important technology event of the oil and gas industry, the 79th EAGE Conference and Exhibition.

The annual event of the European Association of Geoscientists and Engineers (EAGE) offers experts of the oil and gas industry as well as representatives of science the opportunity to exchange ideas and to discuss new approaches. This is all the more important in times, where the global energy mix is changing, while the demand is growing and the industry has to adapt to a new market price environment. DEA is constantly working on sustained technical solutions and is in permanent search for efficiency-enhancing concepts, to assure its high safety and environmental standards on the one hand and meet the economic viability of E&P projects on the other. One example is the concept of multilateral wells, DEA applies successfully for the development of the German oil field Mittelplate. With this concept, the exploitation can be optimised, while the impact on the environment is minimised.

DEA's current international key projects, where the company applies its focused set of capabilities as operator and active licence partner, are located in Europe and North Africa.

Recently in March, DEA and the operator BP started production from three fields of the offshore gas development project West Nile Delta off the mediterranean coast of Egypt. Another growth project in North Africa, the Reggane Nord gas development in the Algerian Sahara is planned to go on stream later this year. In Norway, DEA is the operator of the subsea gas development project Dvalin. And in Germany, DEA has been producing oil as operator from the country's largest and most productive oil field Mittelplate for almost 30 years now.

At DEA's booth (Stand No. 955) in Paris, the visitors can experience live presentations of case studies from international DEA projects and are invited to discuss current industry topics with the DEA experts during the coming days.

Visit our [EAGE 2017 website](#), where we keep you up-to-date with daily reports from Paris.

At this year's conference programme DEA has a total of four lectures. You meet our colleagues here:

[DEA at the technical conference programme](#)

Time/Room	Topic	Speaker
Tuesday 13.30 Room D2	History of a duo lateral Well in the Mittelplate Oilfield Germany, from plan to perforation	Dr Florian Bremer Senior Geologist DEA Deutsche Erdoel AG
Wednesday 10.55 Room C2	Pre-Cretaceous structural development of the Leirdjupet Fault complex and its impact on prospectivity, southwest Barents Sea, Norway	Dr Klaus Dittmers Senior Geologist DEA Deutsche Erdoel AG
Wednesday 11.45 Room C3	Utilizing sea floor samples to de-risk the petroleum system; a case study from Mid Norway	Dr Klaus Dittmers Senior Geologist DEA Deutsche Erdoel AG
Thursday 11.45 Room C3	Capturing structural uncertainty in fault seal analyses - a simple multi-scenario approach	Dr Marc Giba Senior Geologist DEA Deutsche Erdoel AG

Background information

DEA Deutsche Erdoel AG is an international operator in the field of exploration and production of crude oil and natural gas based in Hamburg. Its focus is on safe, sustainable and environmentally conscious exploitation of oil and gas. DEA has 118 years of experience working along the whole upstream value chain as operator or project partner. With a staff force of 1,350 employees, DEA has shares in production facilities and concessions in, among others, Germany, Norway, Denmark, Egypt and Algeria.
